Cables

Sensor Output Cables

Length	Description	Used with Sensors	Catalog Number
Beam Status Output Cable			
1m	Wires from the beam status output connector on the sensor to a remote PLC or other controller	E68....-xyz-B	E68-SVABEAM-1

6

Power Supply Cables

Length	Description	Used with Sensors	Catalog Number
Power Supply "T" Connection			
2m	This cable allows the power supply to be connected between any two zones, while allowing use of those zones. For best results, the power supply cable should be connected at the center of the zones being powered. Tinned leads on power supply end.	E68....-xyC	E68-SVAPWR-C2
		E68....-xyP	E68-SVAPWR-P02
	12 mm DC-key connector on power supply end.	E68....-xyP	E68-SVAPWR-P2
Power Supply			
—	27 Vdc, 100W; short-circuit, overload and overvoltage protection (cycle power to reset). Power supply can normally power up to 50 ISV zones. See V8-T6-24 for more details.	E68....	PS256B-01B1

Release Cables

Length	Description	Used with Sensors	Catalog Number
Release Cable—With Release Connection Only			
2m	This cable is connected to the last zone and allows singulate or slug discharge control from an external system. Release connections only are provided.	E68....-xy	BUS266REL-01B1

Zone Extensions and Jumpers

Zone Extension Cable

Length	Description	Used with Sensors	Catalog Number
E68-SVAEXT-P1	1m Used for zone lengths >36 in	E68....-xyP	E68-SVAEXT-P1

Power Jumper

Length	Description	Used with Sensors	Catalog Number
E68-SVAJMP1-P5	5m Used to slave an asynchronous ZPA chain—does not pass accumulation signals.	E68....-xyP	E68-SVAJMP1-P5

Power Isolation Cable

Length	Description	Used with Sensors	Catalog Number
E68-SVAISO-P	2 ft (0.6m) Used to isolate parallel power supplies on an extended ZPA chain.	E68....-xyP	E68-SVAISO-P

Slug Isolation Cable

Length	Description	Used with Sensors	Catalog Number
E68-SVASLUG-P	2 ft (0.6m) Used to break a slug release signal to affect closer control of product release. Insert between any two zones, and a slug release signal is isolated from all upstream zones.	E68....-xyP	E68-SVASLUG-P

Power Curve Delay Module

Length	Description	Used with Sensors	Catalog Number
1451BS_	Allows ZPA through a powered curve that is not divided into ZPA controlled zones. Installed adjacent to the sensor at the powered curve infeed. All required wiring is included.	E68....-xy	1451BSR1216
		E68....-xyC	1451BSC1216
		E68....-xyP	1451BSP1216

Technical Data and Specifications

E68 Series Integral Sensor Valve

Description	Specification
Input voltage	18–30 Vdc
Power dissipation	1.35W at 27 Vdc
Indicator LED	Red LED: Lights steady when air valve open
Response time	25 ms maximum to 90% air flow. 18.2 Hz maximum operation
Air to drive/Air to brake operation	Specified by catalog number
Beam status output (optional)	Solid-state relay; 400V isolation; 132 Vac/dc maximum switching voltage; 100 mA current switching capacity; 10 mA maximum off-state leakage; 25W maximum on-state resistance. Output protected (current limited) for loads less than 32V. ①
Temperature range	Operating: 14° to 131°F (–10° to 55°C); Storage: –13° to 158°F (–25° to 70°C)
Material of construction	Lens: polycarbonate; cable jacket: polyvinylchloride; body: structural polyurethane foam; muffler: brass; fittings: brass, polybutylene terephthalate, polyacetel, BUNA-N; label overlay: polyester. ②
Mounting	Mount with two #8 fasteners (not included). Torque to between 12 and 14 in-lbs
Connectors	Multi-drop models: Insulation-displacement connectors, factory installed Daisy-chain NEMA 4 models (sealed): 4-pin, DC-key micro-connectors Beam status output: 3-pin male nano-connector
Vibration and shock	Vibration: 30g over 10 Hz to 2 kHz; shock: 100g for 3 ms 1/2 sine wave pulse
Sunlight immunity	10,000 ft-candles
Enclosure ratings	Sealed Daisy-chain models: NEMA 4 ③
Operations	100 million operations over 5 years. Warranty: 3 years (maximum 60 million operations)
Valve type	Three-way, vent to atmosphere
Valve specifications	Cv = 0.03; 0 to 75 psi operation ④
Valve fittings	1/4 in “one-touch” fittings. ⑤
Product packaging	Sensors are bulk packaged. Maximum 10 sensors per bag.

Optical Performance

All optical specifications are guaranteed to be the minimum performance under clean conditions of any product delivered from stock. Typical performance may be higher.

Dirt in the environment will affect optical performance by reducing the amount of light the control receives.

For best results, sensors should be used at distances where excess gain is higher than 1.5 (1.5 times the amount of sensing power required to detect an object under ideal conditions). Higher excess gain will allow the sensor to overcome higher levels of contamination on the lens.

Polarized Reflex

Description	Specification
Source	Visible red, 680 nm
Maximum range	10 ft
Optimum range	0.1 to 8 ft
Field of view	3 in dia. at 12 ft

Diffuse Reflective

Description	Specification
Source	Infrared
Maximum Range	3 ft
Optimum Range	3 in to 2 ft
Field of View	0.2 in dia. at 2 in; 6 in dia. at 5 ft

Notes

- ① Output will reset automatically when short is removed (there is no visual indication of a short-circuit condition).
- ② Do not expose to concentrated acids, alcohols or ketones.
- ③ These products conform to NEMA tests as indicated, however, some severe washdown applications can exceed these NEMA test specifications.
- ④ Dry or lubricated shop air, filtered to less than 5 micrometers required.
- ⑤ Fittings must be tightened to 10.6–17.7 in-lbs.

200 Series Zero Pressure Accumulation

Product Description

The 200 Series by Eaton's electrical sector is an easy to use Zero Pressure Accumulation (ZPA) sensing and control solution. This sensor system solves the problem of product damage and mishandling caused by mechanical sensor rollers on outdated ZPA conveyors.

A Complete, Pre-Engineered Solution

The 200 Series comes complete with all needed components including sensors, pre-measured cables, power supplies, and accessories. These components simply snap together to provide reliable Zero Pressure Accumulation conveyor control without the need to invest costly engineering time in a PLC-based system. The compact power supply, designed specifically for the 200 Series, includes an integral junction box to eliminate additional mounting enclosures.

Features

- Non-contact, true Zero Pressure Accumulation control without a PLC
- Multiple algorithms available to provide the exact functionality you require
- Additional gap and compression timing versions available
- Low installation costs with pre-measured and connectorized wiring
- Fits zone lengths between 18 and 60 inches in 6 inch increments and conveyors up to 60 inches wide
- Compatible with commonly available solenoid-operated air valves
- Sensors are short circuit protected with automatic reset of sensor when short is removed
- System designed with sub-4A 24 Vdc wiring for safety and reduced costs
- Easily interfaced to external control systems for singulated discharge and/or slug release
- Highly optimized, low-cost power supply
- Custom brackets and sensor/bracket assemblies available

DANGER

THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.

For the most current information on this product, visit our Web site: www.eaton.com

For Customer Service in the U.S. call 1-877-ETN CARE (386-2273), in Canada call 1-800-268-3578. For Application Assistance in the U.S. and Canada call 1-800-426-9184.

Product Overview

Fast, Low Cost Installation and Retrofit

The unique 200 Series reduces installation costs by eliminating measuring, wire stripping and attachment of custom connectors. The main buss cable has connectors pre-installed at points to match your conveyor zone length. Zone length can be from 18 to 60 inches in 6 inch increments. Custom wiring harnesses are supplied for an exact fit-between the main buss cable, the solenoid, and the sensor to eliminate unsightly cable loops that might otherwise be snagged and damaged.

High Reliability

200 Series sensors operate in the polarized reflex sensing mode. Polarized sensors eliminate detection errors caused by shiny targets. The sensor's 10 ft maximum range provides high sensing reliability when used at common conveyor widths.

Choose a Sensor to Meet Your Specific Needs

To provide an ideal solution for a wide variety of zero-pressure accumulation needs, 200 Series sensors are available in two different embedded logic modes:

- The Basic Logic Series offers high-throughput smart Zero Pressure Accumulation control. This logic results in singulation and Zero Pressure Accumulation. Each sensor checks the status of the downstream zone and each zone always runs except when both the current and downstream zones are full. Models are available in either Zone Full Delay Timer or Zone Empty Timer configurations
- The Progressive Logic Series offers even higher throughput than the Basic Logic. This logic does not singulate product, but does result in Zero Pressure Accumulation. Each zone always runs until all of the zones downstream are full, allowing maximum efficiency. Models are available in either Zone Full Delay Timer or Zone Empty Timer configurations

Sensor

The 200 Series sensor has been specially designed with upstream communication abilities and internal logic to implement true zero pressure accumulation control. When combined with the components below, a complete ZPA conveyor control system can be literally snapped into place on your conveyor. Two versions are available depending upon the control you require: Basic Logic and Progressive Logic (described on this page).

Sensor with Additional Time Delay

These 200 Series sensors are the same as standard units in all respects, with the exception of additional time delay circuitry designed to afford you enhanced zero pressure accumulation control. Versions with a "Gap Timer" offer you an adjustable delay to insert additional gaps between adjacent products as they move down the conveyor (beyond those gaps normally present due to the operation of the built-in true zero pressure accumulation logic). Versions with a "Compression Timer" offer you an adjustable delay to compress packages together during the accumulation process.

Sensor Harness

The sensor harness connects the sensor to the buss harness and solenoid^①. This is the only custom part of the system—the length is optimized for an exact fit on your conveyor to eliminate cable loops that could otherwise be damaged.

Buss Harness

The buss harness distributes power, slug release signals and provides communications links. Made from flat ribbon cable, it is available in 10, 50 and 100 ft lengths and is connectorized at intervals to match your zone length (18 to 60 inches in 6 inch increments).

It's So Easy to Get Started, All That's Needed Is:

- Your conveyor zone length(s)
- Preferred ZPA algorithm
- Sensor harness cable lengths:
 - Distance from sensor to power buss harness
 - Distance from sensor to solenoid
- Solenoid valve manufacturer and model number

Note

^① A customer-supplied solenoid/valve is required at each zone to control the conveyor pneumatics. Eaton recommends a solenoid below 1.8 Watts.

Product Selection

Basic and Progressive Logic Sensors

Basic Logic Sensor

Basic Logic Sensors

Logic	Type	Sensing Range	Optimum Range	Field of View	Additional Timing	Operate Mode	Output	Standard Catalog Number
Basic logic	Polarized reflex	10 ft (3m)	0.1 to 8 ft (0.03 to 3.6 m)	3 in (76 mm) diameter at 12 ft (3.6m)	—	Air to drive	NPN	14266RLN17B1

Technical Data and Specifications

Basic and Progressive Logic Sensors

14266 and 14286 Models

Description	Specification
Input voltage	18 to 30 Vdc, reverse polarity protected
Power dissipation	250 mW maximum
Output type	NPN or PNP
Current switching capacity	100 mA maximum
OFF-state leakage	10 mA maximum
ON-state voltage drop	2.5V at 100 mA
Slug input	NPN: Integral diode isolates slug input; input is protected against mis-wiring and is active from "0" to a voltage level equal to the current "input voltage" minus 6 volts PNP: Integral diode isolates slug input; input is protected against mis-wiring and is active from 1–30 Vdc
Response time	8 ms
Connector	5-pin, works with mating plug AMP #104257-4; 2-pin, works with mating plug AMP #104257-1
Temperature range	Operating: –25° to 55°C (–13° to 131°F) Storage: –25° to 70°C (–13° to 158°F)
Material of construction	Lens: Polycarbonate; body: Cyclopol and Lexan; connector: glass-filled PCT
Vibration and shock	Vibration: 30g over 10 Hz to 2 kHz; shock: 30g for 10 ms 1/2 sinewave pulse
Enclosure ratings	NEMA 1
Cable-pull strength	20 pounds (static)
Short-circuit protection	The output is protected against dead shorts only. Operation: Output is continuously retried at 3 ms intervals and will automatically reset when short is removed (no visual indication of a short-circuit condition). ①
Indicator LED	Lights steady when output is ON; OFF when output is OFF; OFF when output is in short-circuit mode

Enclosure ratings	NEMA 1
Cable-pull strength	20 pounds (static)
Short-circuit protection	The output is protected against dead shorts on the NPN output only. Operation: output is continuously retried at 3 ms intervals and will automatically reset when short is removed (no visual indication of a short-circuit condition). ①
Indicator LED	Lights steady when output is ON; OFF when output is OFF; OFF when output is in short-circuit mode

Note

① **CAUTION:** Will not protect against overloads between 100–300 mA.

Optical Performance

Basic, Progressive Logic and Standard Sensors

All optical specifications are guaranteed to be the minimum performance under clean conditions of any product delivered from stock. Typical performance may be higher.

Dirt in the environment will affect optical performance by reducing the amount of light the control receives. For best results, sensors should be

used at distances where excess gain is higher than 1.5 (1.5 times the amount of sensing power required to detect an object under ideal conditions). Higher excess gain will allow the sensor to overcome higher levels of contamination on the lens. All ranges and excess gain graphs are based on a 3 in retroreflector.

Basic, Progressive Logic and Standard Sensors

Description	Specification
Source	Visible red, 680 nm
Maximum range	10 ft
Optimum range	0.1 to 8 ft
Field of view	3 in dia. at 12 ft

Excessive Gain

Basic, Progressive Logic and Standard Sensors

Performance measured to 3 in retroreflector.

1. Typical performance
2. Minimum performance

Sensor Power Supply—NEMA 4 Universal Voltage

Product Description

The Sensor Power Supply by Eaton's electrical sector was specially designed to be used with the 200 Series and E68 Series Zero Pressure Accumulation Systems, but is also suitable for use in a wide variety of general material handling applications. The unit delivers 100W output at 27 Vdc and supports easy, Class II wiring. The power supply is a tamper-proof, rugged component easily mounted to a conveyor side-channel or support. Internal components are fully protected in a sealed metal housing to stand up to rugged application, ensuring flawless performance in any material handling environment.

Features

- Integrated AC junction box features for one-step mounting and wiring without the need for additional accessories or enclosures
- Built-in DC power health contact allows easy monitoring of power supply status
- Unique design features a tamper-proof sealed construction to reduce the risk of damage associated with conventional open control-panel type supplies
- Built-in slug-release input converts an AC or DC input to the appropriate DC signal for integration with the 200 Series and E68 Series Zero Pressure Accumulation Systems
- Dual output connection terminals to make it easy and convenient to locate the power supply at the center of the cable run

Standards and Certifications

- UL Listed, E253190
- UL tested to Canadian safety standards
- RoHS Compliant

⚠ DANGER

THIS SENSOR IS NOT A SAFETY DEVICE AND IS NOT INTENDED TO BE USED AS A SAFETY DEVICE. This sensor is designed only to detect and read certain data in an electronic manner and perform no use apart from that, specifically no safety-related use. This sensor product does not include self-checking redundant circuitry, and the failure of this sensor product could cause either an energized or de-energized output condition, which could result in death, serious bodily injury, or property damage.

Universal Voltage

Sensor Power Supply—NEMA 4 Universal Voltage

Operating Voltage	Output	Slug Input	Type	Slug Output	Catalog Number
100–250 Vac	27 Vdc, 100W; short circuit, overload and overvoltage protection (cycle power to reset)	15–132 Vac/dc 3 mA minimum	Standard For use with 200 series and E68 systems	Sinking or sourcing, switch selectable; 80 mA maximum; short circuit protection for loads less than 32 Vac or Vdc (auto reset)	PS256B-01B1
			High current slug For use with solenoid valve systems requiring full current slug signals 4-pin DC M12 output connector	Sinking only; 100W output; short circuit, overload and overvoltage protection (cycle power to reset) ①	PS256B-05B1

Technical Data and Specifications

Sensor Power Supply—NEMA 4 Universal Voltage

Description	PS256B-01B1	PS256B-05B1
Input power	115W, maximum inrush 30A from cold start	115W, maximum inrush 30A from cold start
Input voltage	100–250 Vac	100–250 Vac
Input current (full load)	115 Vac: 2A; 230 Vac: 4A	115 Vac: 2A; 230 Vac: 4A
Output power	100W	100W
Output voltage	27 Vdc	27 Vdc
Output protection	Short circuit, overload and overvoltage protection (auto-reset)	Short circuit, overload and overvoltage protection (auto-reset)
Regulation	±3%	±3%
Slug input	15–132 Vac/dc	15–132 Vac/dc
Slug output	Sinking or sourcing, switch selectable; 80 mA maximum; short circuit protection for loads less than 32 Vac or Vdc (auto reset)	Sinking only; 100W output; short circuit, overload and overvoltage protection (cycle power to reset) ①
Indicators	Red LED: AC in; green LED: DC out	Red LED: AC in; green LED: DC out
DC power monitor output	NO contact, solid-state relay, 80 mA maximum	NO contact, solid-state relay, 80 mA maximum
Temperature range	–13° to 131°F (–25° to 55°C)	–13° to 131°F (–25° to 55°C)
Vibration	IEC 68-2-6 Test FC 10g	IEC 68-2-6 Test FC 10g
Enclosure material	Aluminum	Aluminum
Enclosure rating	NEMA 4X	NEMA 4X
Connections		
DC	Main output/slug output: One 6-position plug-in style connector ②	Main output/slug output: One 6-position plug-in style connector ②
AC	AC line input, DC fail indication and slug input: One 7-position plug-in style connector ③	AC line input, DC fail indication and slug input: One 7-position plug-in style connector ③

Notes

- ① Total output power of supply is 100W. Total supply output power (100W) = main output power + slug output power.
- ② On model PS256B-05B1, a single 12 mm DC key micro-connector is mounted to the outside of the enclosure and pre-wired to the internal connector (see above).
- ③ On model PS256B-02B1, DC fail indication and slug input terminals are not active.

Note

① Install jumper for single power supply systems. In systems where multiple power supplies are connected to a DC bus, install the jumper in only one supply.
