Instruction

3 pages

1

General

A good environment in the operations and in the handling products are important for CHS Controls. The objective of the environmental work is that all activities should be of high quality and comply with regulations for the handling of products.

2

Operations

CHS Controls AB is a sales company without its own production. The company represents other companies' products with long-term relationships. The company has, next to the office, a warehouse where many products are received and delivered from. The company designs and assembles some smaller systems through collaboration with local companies, which assemble the final product.

The products as marketed, are mainly electrical appliances and installation materials, enters as intermediate products in our customers' products, or constitute complete products. The customers are machine manufacturers, OEM, and companies and process industries and the public sector. Many of our products will meet their end use in Europe, but an important skill in our offer are products for export, for example, according to the North American standard, UL, ANSI, NFPA, and end-use customers on the market.

3

Environmental Regulations

The Company monitors the products marketed on the basis of the RoHS and REACH directives from the EU. These directives must be followed. Some of our clients have more stringent requirements for their deliveries and we help them to find products that meet their requirements, for example in the standards applicable in North America. We follow up to provide certificates and information about our products' environmental impact of the RoHS and REACH.

4

Waste separation

The Company has a routine to waste separate all waste materials for recycling. This applies to packaging materials such as corrugated cardboard and plastic as well as for transporting materials as wooden pallets. Office paper are handled separately for recycling separately from other residual waste.

5

Travel

The Company's external activities as trips, but also for staff travel, sought and encouraged carpooling and that is carried out in the most environmentally friendly way. For customer visits, where the car is used, the coordination of the visits are planned.

6

Energy Consumption

Energy consumption in the company's premises are kept as low as possible through the use of energy-efficient luminaires and LED lamps.

On procurement of office machinery priority is for equipment with the best energy value.

Heating of the leased premises is done by using the city's district heating network.

7

Use of chemicals

The Company uses few chemicals. In particular, products for cleaning. At selection of products the types that are broken down into natural products are the first choice. Monitoring is done via the product data sheet.
